

ROYAL DINXPERLO

Beaver mesh

100 years of wire mesh expertise

Thanks to the knowledge and expertise of our highly skilled and highly motivated professionals, our 13000m² production location and our vat experience in global projects, we can create pretty much any wire mesh product you need.

Our regular mesh products can be delivered from stock and our team is always happy to help with any innovative custom made solutions you may require.

ROYAL DINXPERLO

WIRE WEAVING

Beaver mesh for dike protection

Beavers are making a strong comeback in the Netherlands. While this is a positive sign for nature, the presence of beavers also brings new challenges. Through their digging activities, beavers can cause damage to dikes, riverbanks, and other flood defenses. As a result, the need for effective and sustainable protective measures is increasing.

Welded beaver mesh

Royal Dinxperlo manufactures high-quality beaver mesh specifically designed to protect flood defenses against damage caused by digging. Thanks to its robust construction and carefully selected mesh size, our beaver mesh offers an effective solution that respects the natural habitat while simultaneously enhancing the safety of water infrastructure.

Product	Welded mesh.
Application	Dike protection.
Openings	Various precise sizes.
Material	Stainless steel AISI 304(L) and 316(L). Other materials upon request.
Wire	Various wire sizes.
Properties	In accordance with customer requirements.
