WIRE WEAVING

Reliable protection within one of the most critical safety systems in the automotive industry

Safety is paramount in the automotive industry. Modern vehicles are equipped with advanced safety systems designed to protect occupants within a fraction of a second in the event of a collision. The airbag is one of the most important examples of this. Behind the rapid and controlled deployment of an airbag lies cutting-edge technology, in which every component must meet exceptionally high quality standards.

Woven metal mesh for airbag systems

Safety is paramount in the automotive industry. Modern vehicles are equipped with advanced safety systems designed to protect occupants within a fraction of a second in the event of a collision. The airbag is one of the most important examples of this. Behind the rapid and controlled deployment of an airbag lies cutting-edge technology, in which every component must meet exceptionally high quality standards
