

ROYAL DINXPERLO

Aviary mesh

100 years of wire mesh expertise

Thanks to the knowledge and expertise of our highly skilled and highly motivated professionals, our 13000m² production location and our vast experience in global projects, we can create pretty much any wire mesh product you need.

Our regular mesh products can be delivered from stock and our team is always happy to help with any innovative custom made solutions you may require.

ROYAL DINXPERLO

WIRE WEAVING

Optimal wildlife experience

Aviaries fulfill two important needs: they make comfortable and safe natural environments for animals and offer the best possible wildlife experience for humans. The first thing to do when fulfilling these needs involves selecting the perfect wire mesh. Suitable openings help to keep wildlife inside, while keeping out unwanted dangerous animals. The quality of the wire and the selected finishing play a role in offering clear views for spectators.

Woven and welded aviary wire mesh

Animals are housed in our mesh all throughout Europe. It is testament to our longstanding experience and durable product quality. We cooperate with clients, architects and constructors to play an active role in aviary development. Our sustainable woven and welded wire mesh is produced to please both people and animals. Our top quality animal mesh does not feature sharp edges or harmful plastic coatings. An optional high quality black powder coating helps to create the best possible experience for visitors, while making aviaries an enjoyable place to be for wildlife.

Product	Woven/welded mesh.
Application	Small bird and parrot aviaries.
Openings	Various precise sizes ranging from 0.1 mm to 25 mm.
Material	Various materials.
Wire	From 20 µm to 3 mm.
Properties	In accordance with customer requirements.
Delivery	Rolls (Standard length of 25 m, longer upon request).
Quality	Top Dutch quality. Production according to ISO 4782:1987 and ISO 9044:1999 (weaving).
