Paper-moulded mesh for paper pulp packaging

Every day, millions of egg cartons, fruit trays, and other paper pulp packaging products are manufactured. Behind these everyday products lies a precise manufacturing process in which the quality of the mold determines the final result. An important component of this mold is the metal mesh that supports the paper fibers during the forming process.

Woven paper-moulded mesh

Royal Dinxperlo produces high-quality paper-moulded mesh that has been specially developed for suction molds in the paper pulp industry. Thanks to its unique combination of flexibility, precise mesh openings, and customization, our metal mesh forms the ideal foundation for high-quality paper pulp packaging.

Product	Woven mesh.
Application	Pulp packaging.
Openings	Various precise sizes.
Material	Stainless steel including AISI 304(L) and AISI 316(L).
Wire	Various wire sizes.
Properties	In accordance with customer requirements.
Delivery	Rolls (Standard length of 25 m, longer upon request).
Quality	Top Dutch quality. Production according to ISO 4782:1987 and ISO 9044:1999 (weaving).
