

ROYAL DINXPERLO

Screen printing

100 years of wire mesh expertise

Thanks to the knowledge and expertise of our highly skilled and highly motivated professionals, our 13000m² production location and our vast experience in global projects, we can create pretty much any wire mesh product you need.

Our regular mesh products can be delivered from stock and our team is always happy to help with any innovative custom made solutions you may require.

ROYAL DINXPERLO

WIRE WEAVING

Screen printing mesh for precise printing results

In screen printing, ink is applied to the underlying material through a fine-mesh screen. The quality of this screen mesh has a direct impact on the distribution of the ink and, consequently, on the accuracy and appearance of the final result. Even minor irregularities in the mesh can become visible as streaks, colour variations or irregularities.

Woven screen printing mesh

Royal Dinxperlo manufactures high-quality stainless steel screen printing mesh for applications requiring a consistent mesh structure and a flawless print result. The mesh is precision-woven and supplied completely clean, free from creases, folds, streaks or weaving defects.

Product	Woven mesh.
Application	Screen printing.
Openings	Various precise sizes.
Material	Stainless steel AISI 304.
Wire	Various wire sizes ranging from 0.02 mm to 0.5 mm.
Properties	In accordance with customer requirements.
Delivery	Rolls (Standard length of 25 m, longer upon request).
Quality	Top Dutch quality. Production according to ISO 4782:1987 and ISO 9044:1999 (weaving).
