Precise support for efficient and uniform cultivation

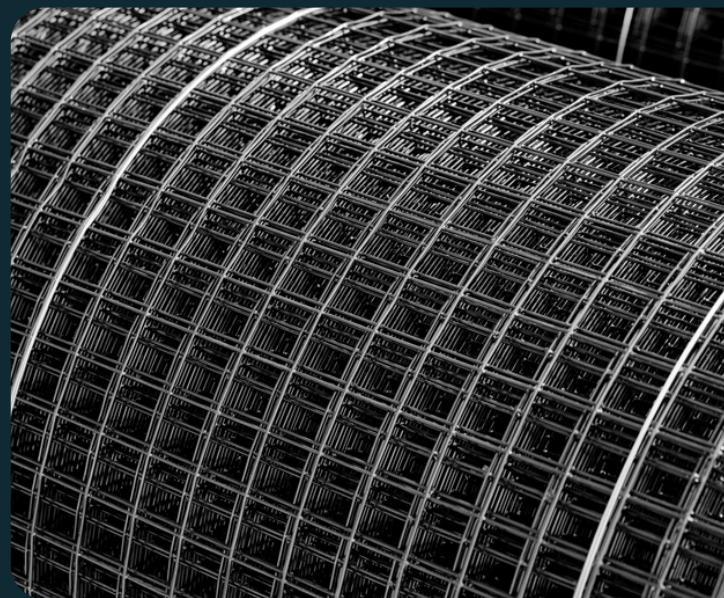

In modern horticulture, efficiency, automation and consistent product quality are playing an increasingly important role. To ensure flowers grow to their full potential whilst enabling an efficient cultivation process, reliable support is essential. Flower mesh is an indispensable part of this. Thanks to its precise mesh structure, flowers are guided and supported as they grow, resulting in an even crop that is suitable for both manual and automated cultivation processes.

Welded flower mesh

Royal Dinxperlo supplies high-quality welded flower mesh that has been specially developed for professional applications in horticulture. Thanks to its combination of dimensional stability, precise mesh size and consistent quality, our flower mesh offers a reliable solution for growers who set high standards for their production process.

Product	Welded mesh.
Application	Flower greenhouses.
Openings	Various precise sizes.
Material	Galfan steel.
Wire	1,4 mm, 1,6 mm of 2 mm.
Properties	In accordance with customer requirements.
