

ROYAL DINXPERLO

Deep-fry baskets

100 years of wire mesh expertise

Thanks to the knowledge and expertise of our highly skilled and highly motivated professionals, our 13000m² production location and our vast experience in global projects, we can create pretty much any wire mesh product you need.

Our regular mesh products can be delivered from stock and our team is always happy to help with any innovative custom made solutions you may require.

ROYAL DINXPERLO

WIRE WEAVING

Hygienic, sustainable and suitable for direct contact with food

Within the food industry, hygiene, food safety and sustainability are key priorities. Materials that come into direct contact with food must meet high quality standards and be able to withstand intensive use and frequent cleaning. Metal mesh plays an important role in this regard. A common application is the production of deep-fry baskets, where the mesh offers the ideal combination of strength, openness and hygienic properties.

Welded and woven deep-fry basket mesh

Royal Dinxperlo supplies high-quality woven and welded stainless steel mesh used in the production of deep-fry baskets and other components within the food industry. Thanks to its consistent quality and precise manufacturing, our mesh forms a reliable basis for products used daily under demanding conditions.

Product	Welded mesh.
Application	Deep-fry baskets.
Openings	Various precise sizes.
Material	Stainless steel.
Wire	Various wire sizes.
Properties	In accordance with customer requirements.
Delivery	Rolls (Standard length of 25 m, longer upon request).
Quality	Top Dutch quality. Production according to ISO 4782:1987 and ISO 9044:1999 (weaving).
